— Seedlings	460	
— Equip Hire	35	
— Labour extra	30	
TOTAL	\$595	per hectare

Your Seedling Price - includes much more than just a saltbush seedlings

We only supply strong, quality grown seedlings produced from using the very best nursery practices. In our nursery, we use a special cell growing technique that produces the straightest & strongest possible stems & roots. This is most critical for successful field establishment and importantly the on-going grazing performance of the plant. For extra strength our seedlings are grown over a 6 - 8 month period in the nursery. They are also pruned to create the most optimum root to shoot ratio and to produce many bud & leaf points.

Full on property agronomic support is included to ensure successful seedling establishment.

Continued on-property inspections for 4 to 5 years - you know you are always getting the best advice.

Seedlings graded & packed in waxed boxes - ready for the quickest & easiest field transplanting operation.

Free delivery of seedlings - (for commercial quantities only).

Transplanting supervision on property (commercial quantities) to ensure transplanting is done properly.

Continued on farm grazing management support and advice.
